Assessment of Need and Enforcement Plan  
Idaho City Ranger District – Boise National Forest  
Order #0402-03-39

1. Background. The Idaho City Ranger District will be planting tree seedlings in the Crooked River drainage this spring. In order to access these planting units, National Forest Road #384 will need to be plowed. This will need to be done early enough to allow the road to dry so minimal resource damage will occur. This portion of the snowplowed road is a groomed snowmobile trail creating mixed user conflicts and public safety issues. Also, uncontrolled vehicle use during spring thaw conditions could result in resource damage.

2. Intent of Subpart B order. This temporary road closure is for all motorized access to promote public safety during snow plowing and prevent resource damage during spring thaw conditions.

3. Enforcement Plan. On ground signing, temporary barricades if needed, and maintenance of the sign at the intersection of State Highway 21 and NFSR#384 to advise the public of the temporary road closure during spring tree planting and spring thaw conditions and posting of the closure Order and information signing at designated snowmobile parking areas. On site FS administrative personnel will make compliance contacts as needed.
